ABOUT PRO-JECT

**1991
THE START**
with the launch of the
first Pro-Ject turntable,
named Pro-Ject 1,
CEO Heinz Lichtenegger
founded the brand

**1997
DEBUT**
with the idea of
turning a Hifi product
into a lifestyle product,
the Debut Turntable
was born and was sold
more than 600.000
times until today

**2000
NEW FACTORIES**
in order to produce
the electronics, new
partnerships were
formed in Czech
Republic and Slovakia

**1993
PARTNERSHIP**
after the collapse of the
iron curtain, Heinz Lichtenegger
formed a partnership with a former Tesla
factory in Czech Republic
that is, until today, producing for
Pro-Ject Audio Systems

**1994
Pro-Ject 6**
first High End
turntable

**1998
BOX DESIGN**
Pro-Ject started to
produce their own
Hifi Electronics

first digital products:
Pre Box, Amp Box,
and DAC Box

2017 HEADQUARTER

opening of the new headquarter in Lower
Austria, including an office, a logistics center,
administration, R+D and an
reference Pro-Ject shop

HEADQUARTERS

 **Pro-Ject**

HEADQUARTERS

Our headquarter is located 35 kilometers North of Vienna in the beautiful Weinviertel region. It has been opened in August 2017. On a total area of 12,200 m² three different parts with different functions and purposes can be found. In the 1,200 m² office area there is an elegant customer area with an inviting foyer and our flagship store. In three listening and demo rooms our products can be experienced and heard. Next to the plan offices and separate offices, there is a 130 m² development and service area. The heart of our headquarter is a 300 m² Atrium.

Extensive is the storage area with more than 3,000 m²: In addition to 6 truck docking stations and a 450 m² order picking area, it includes a small parts warehouse with a height of more than eight meters. Every year more than 4,000 pallets are shipped to 80 countries worldwide. Whether by parcel, pallet goods or whole containers. The headquarter was built in the highest standards, in terms of design and efficiency.

HANDMADE IN EUROPE

HANDMADE IN EUROPE

With cutting edge technologies and machines, we are able to create visually pleasing products without losing the eye for the finest details. In the Czech Republic, we produce all our turntables from scratch, by hand and in-house. From the tiniest screw to the chassis, everything is done by our technicians. A strict four step quality control ensures that everything works as intended.

In Slovakia we manufacture micro sized high end audio components. By shrinking the cabinets to a miniature size, we were able to save costs and offer our customers a true price to performance relation. We pride ourselves with products that have a long-lasting value and give our customers satisfaction in all their audio needs.

ESSENTIAL LINE

Find the perfect turntable for your needs

The Essential III Flexi-Range is a family of turntables. All share their core DNA, but like in any good family, each member has its own strengths. Each Essential model comes equipped for the exact needs of the customer.

JUKE BOX LINE

Audiophile “All-in-one Plug & Play” turntable system

The Juke Box Line is the optimum solution with analogue and digital inputs, a power amplifier and true stereo sound built into the chassis of a great sounding turntable.

DEBUT LINE

Audiophile sound and high - end materials for a good value

The Debut Line offers outstanding value and delivers audiophile sound with top notch components. For the first time ever, there has been a Carbon tonearm in this price range. Metal main platter, Ortofon 2M cartridge and a rigid, heavy weight chassis all make the Debut Line an exemplary turntable for its price.

THE CLASSIC

Classic look combined with modern technology

The Classic was born in celebration of our 25th anniversary. It sports a timeless and elegant real-wood chassis, a newly developed Carbon/Aluminium tonearm and an aluminium sub-chassis that is dampened by high-tech TPE balls. Classic in looks with a few modern technologies under the hood.

Less vibration trough droplet-form

The RPM Line consists of our droplet-form turntables. This kind of form is known for less vibrations due to its build nature.

The RPM Line also uses fully decoupled and separate motors for better sound. High quality materials and out-of-the-box thinking unveil the full potential of each model.

Celebrate with our Anniversary Products

With the Anniversary Products we celebrate with our partners and friends. We use very special materials, such as parts of instruments or Copper bodies. These goods are very often strictly limited.

What is Box Design S2?

We designed a completely new and revolutionary range of high-end electronic micro components and loudspeakers engineered and manufactured according to the same principles as our acclaimed turntables. The idea of our S2 is to make the devices as small as possible, but still have a breathtaking sound performance.

BOX DESIGN DS2 LINE

About DS2 Line

As with every Box Design line, our DS2 series is designed as a modular product range. This means you can customize your music system to have the features you want. The cabinets of the components are small enough to fit in almost any space. The enclosures are made of high-grade aluminum, available in silver or black. Optional side panels, made from European wood, are perfectly aligned and matched to the finish of our woodgrain turntables.

Reference Line

The RS Line is our very top of the line series, featuring only the absolute best components. Class A circuitry, tube stages, analogue potentiometers – all to deliver the maximum sound. The RS Line features a harmonic and musical sound that convinces with a lush midrange and loads of emotions.

Produced in Europe.
